

Belzona Achieves ISO 9001:2008 Registration

Belzona is pleased to announce that it has achieved its registration to the updated QMS (Quality Management System) ISO 9001:2008 after an audit carried out on 11th August 2009 by British Standards Institute.

Dr Bill Ashcroft, Managing Director commented, 'This is another milestone on the road to the globalisation of our business. Achieving the upgraded standard obliges Belzona to drive continuous improvement in customer service and satisfaction and builds on our existing commitment to deliver quality product and service.'

Belzona first registered its manufacturing processes in January 1990 with the industry standard for Quality known as BS 5750 which was superseded in 1994 by ISO 9002. In November 2003, product design and development processes were registered to achieve the requirements of ISO 9001:2000.

The new ISO 9001:2008 registration certificate (No. Q 09335) is available on the Belzona website and the BEL for those that may require a copy.
