**Belzona, Inc. Coating NSF Approved for Drinking Water System Components**

Miami, FL – (January 1, 2007) Belzona, Inc., a manufacturer of industrial protective coatings and repair composites, recently received NSF approval for Belzona® 5811 (DW Immersion Grade). The NSF/ANSI Standard 61 approval makes it an appropriate coating for fittings, pipes, tanks, valves, and other drinking water system components where potable water approval is required. The two component coating solution is available in either beige or haze gray and can be applied by either brush or spray. Designed specifically for the water industry, this NSF approved coating is yet another addition to the other NSF approved solutions provided by Belzona, including Belzona® 1341 (Supermetalglide), a totally unique coating system which has been proven to increase efficiency in pumps.

**About Belzona Inc.**

As the manufacturer of industrial protective coatings and repair composites since 1952, Belzona provides a wide variety of solutions to rebuild, repair and maintain machinery, equipment and building structures. Belzona's local on-site Technical Consultants analyze the situation, recommend the solution, and supervise the application. With their Global Distribution Network covering over 120 countries and 24-hour Technical Support, Belzona is established in the forefront of industry by serving such markets as oil and gas, power, marine, and water/wastewater.
